Fertiliser for Life

# EXPRESS<sup>®</sup> NK +TE

**A premium Nitrogen, Potassium & trace element liquid fertiliser**

## KEY BENEFITS:

- Ideal for structural development and growth
- An efficient N source with added Trace Elements

Express<sup>®</sup> NK +TE is a high Nitrogen liquid fertiliser, balanced with Phosphorus, Potassium and a full chelated trace.

Express<sup>®</sup> NK +TE delivers growth and strength, suited to high production crops, where yield is the goal without sacrificing quality. Express<sup>®</sup> NK +TE is suited to harsh conditions where other nitrogen sources fail to deliver such as arid environments and semi sodic conditions.

Express<sup>®</sup> NK +TE can be applied foliar or to the soil through in furrow techniques and drip irrigation. Express<sup>®</sup> NK +TE is gentler than average Nitrogen products, ensuring it is softer to handle and less corrosive on machinery fittings.

## TYPICAL ANALYSIS

Express<sup>®</sup> NK+TE (23-2-4-2) w/v%

### Nitrogen (N)

N as Ammonium	5.7%
N as nitrate	5.8%
N as urea	11.5%
N Total	23.0%

**Phosphorous (P)** as phosphate 1.8%

**Potassium (K)** as phosphate 4.5%

**Sulphur (S)** as sulphate 1.9%

w/v%

**Magnesium (Mg)** as EDTA Chelate 0.1%

**Iron (Fe)** as EDTA Chelate 0.040%

**Copper (Cu)** as EDTA Chelate 0.025%

**Manganese (Mn)** as EDTA Chelate 0.040%

**Zinc (Zn)** as EDTA Chelate 0.026%

**Boron (B)** as boric acid 0.010%

**Molybdenum (Mo)** as sodium salt 0.004%

**Cobalt (Co)** as EDTA Chelate 0.002%

## CROP/PLANT TYPE

## RATE

## MIN. DILUTION

## TIMING

Tree Crops (Pome, Stone, Nuts, Mangoes, Avocados)	2.5L/Ha foliar 5-10L/Ha soil	1:300	Apply as required for structural development and fruit sizing. Avoid high rates at flowering and on Red Pome fruit. Favour higher rates of water on sensitive varieties.
Vines Wine	2.5L/Ha foliar 5L/Ha soil	1:300	Apply if Nitrogen required. Do not apply foliar with wettable sulphur.
Vines Table	5-8L/Ha soil	1:200	Apply as required while fruit sizing.
Vegetables	2.5-3.5L/Ha foliar 5-15L/Ha soil	1:200	Apply when leaf area is sufficient to accept spray. Repeat as required. Favour higher rates of water on sensitive varieties.
Turf	5-15L/ha 50-150mL/100m <sup>2</sup>	1:80	Water in for best results
Broadacre & Pasture	2-25L/Ha foliar 5-50L/Ha furrow	1:40	Apply as required. In furrow treatment should be banded away from seed at lower water rates.

AVAILABLE FROM 20L THROUGH TO 1000L IBC OR BULK | FOR ALTERNATIVE USES OR APPLICATIONS PLEASE CONTACT YOUR ECO GROWTH<sup>®</sup> NUTRITIONAL EXPERT.
