MYCO ACTIVE

Soil bio-stimulant to improve nutrient & moisture uptake

KEY BENEFITS:

- Boosts plant nutrient and moisture uptake
- Improves root development
- Increases plant vigour

Eco Growth Myco Active enhances nutrient and moisture uptake by emulating root exudates and stimulating beneficial microbes.

Myco Active contains a complex range of compounds that perform or mimic natural hormone-like biochemicals that normally diffuse through the soil from the root system. These compounds stimulate responses from the soil bacterial populations to change/increase activity.
