Fertiliser for Life

# SF AVO

## Balanced fertiliser designed specifically for avocados

### KEY BENEFITS:

- Designed to combat bi-annual bearing
- Maintain size with increased yield
- Encourage strong, healthy trees
- Safe to apply during flowering and fruit set
- Builds soil biology & strengthens roots
- Suits most spreader types
- Biologically Activated

Developed from over 20 years of infield use, SF Avo has been specifically created for the Avocado industry as it boasts a high analysis, yet is safe to use through delicate parts of the season such as flowering and fruit set. SF Avo provides a very simple one-step complete nutritional benefit, including Nitrogen – without causing tree or soil imbalances.

Matching nutrition to your crop's needs all season is the key to healthier, consistently productive trees. Reduce fruit drop and maximise size, consistency and yield with a complete balance of key nutrients, including Silicon with SF Avo.

Silicon hardens roots and this element is supplied through SF Avo (which is a Silicate mineral fertiliser). It is possible to harden avocados against root damage, especially in the presence of subsoil Aluminium.

### TYPICAL ANALYSIS

SF Avo	w/w%		mg/kg
Nitrogen (N)	7.0	Zinc (Zn)	5040
Phosphorus (P)	4.4	Manganese (Mn)	353
Potassium (K)	12.8	Copper (Cu)	32
Sulphur (S)	8.8	Molybdenum (Mo)	8
Calcium (Ca)	5.6	Boron (B)	3663
Magnesium (Mg)	2.3	Cobalt (Co)	6
Iron (Fe)	0.9	Selenium (Se)	1
Silicon (Si)	6.8		
Carbon (C)	2.0		

### CROP/PLANT TYPE

### RATE

### TIMING

Avocado trees

30g/m<sup>2</sup> of shade cover  
70-350g/tree (up to 600g/tree)

Vary frequency of application according to tree development and crop load

AVAILABLE IN 25KG & 500KG/1 TONNE BULKA BAGS | FOR ALTERNATIVE USES OR APPLICATIONS PLEASE CONTACT YOUR ECO GROWTH® NUTRITIONAL EXPERT.

Eco Growth is Australia's leading manufacturer of biologically activated fertilisers

# Feed the soil to feed the plant

Soils are diverse and complex living ecosystems. Biologically driven soil processes provide plant nutrition and their presence are a key indicator of overall soil health and functioning. Without biology, soils are simply geology.

Biologically active soils are the cornerstone of healthy, resilient and sustainable agricultural production systems. When functioning effectively, soil microbe-plant root interactions positively influence plant health and productivity. Microbial activity in the rhizosphere surrounding plant roots stimulates soil building processes and enhances mineral availability.

Eco Growth's Eco Advance® Premium Biology is our proprietary granular fertiliser inoculum, containing select strains of beneficial soil microbes and complementary bio-stimulants. This powerful microbial primer/catalyst works by kick-starting soil microbial activity. As a result, microorganism-based processes are supported that have many soil and plant benefits, including natural mineral cycling, enhanced nutrient release and delivery, improved soil structure and moisture retention, and increased overall plant health and resilience.

## COMPLEMENT YOUR GRANULAR PROGRAM WITH OUR PREMIUM LIQUID FERTILISERS

Our chelate complex liquids are designed to penetrate the leaf quickly and effectively, but not deposit harmful chlorides or damaging salts, which can cause plant damage and encourage fungal and insect attack.

### Eco-Vital®

A Commercial Strength Liquid Kelp & Fish Fertiliser designed for a fast response.

Rich in natural Nitrogen, Phosphorous, Potassium, Calcium, 15+ Trace / Rare-Earth elements, +natural growth regulators.

### Express NPK

A premium, fast acting and complete liquid fertiliser providing highly available N, P & K with a balance of chelated Trace Elements.

Ideal for a wide variety of crops and plants, Express® NPK improves fruit size whilst maintaining colour & quality.

### Eco-Humate

Liquid Humic Acid (alkali pH), lifts soil Cation Exchange Capacity (CEC).

Holds water and boosts nutrient availability in the soil, by forming a humus complex. Protects plants from salts and toxins such as Aluminium, whilst boosting beneficial microbe activity.

### Express TE

A complete, complexed liquid trace element fertiliser fortified with nitrogen and magnesium.

Replenishes essential micronutrients required for healthy metabolic function and balanced development.

### Express PK

Liquid phosphorus, potassium and trace element fertiliser for rapid correction of P & K deficiencies.

A highly plant available and versatile liquid, Express PK can also be used to improve salt tolerance, reduce splitting, and harden and colour fruit.

### Express Potassium Silicate

Liquid silica increases plant strength and enhances overall resilience.

Increases nutrient utilisation, improves resistance to pests & diseases and tolerance to aluminium toxicity, salinity, frost and heat stress.
